MASSACHUSETTS
STATE TRAINING INVENTORY
STI

The **State Training Inventory (STI)** is a computerized database that allows users to identify training programs and providers at the secondary and postsecondary levels, by:

- **Geographic area**, including service delivery area (SDA), county, labor market area, metropolitan statistical area, Massachusetts or multi-State area (New England and New York).

- **Type of institution**, including secondary and adult vocational or technical school, community or technical college, four-year college or university, proprietary school, hospital, and JTPA.

- **Occupational title** or **training program** title or code.

STI contains several features useful to employment and training organization users. These include the SDA geographic coding of all schools in the database. This allows users to specify their SDA area and obtain a comprehensive listing of the existing training resources for that area. Users may also specify an occupational title and obtain a listing of local providers offering related training. **STI** has the addresses and telephone numbers of all providers.

STI was developed by the Massachusetts Occupational Information Coordinating Committee (MOICC) in cooperation with the National Occupational Information Coordinating Committee and the Massachusetts Department of Employment and Training. The database is updated annually and is available to users in print or disk format.

MOICC can provide a demonstration of **STI** and arrange for copies of the software and support materials, including a manual describing how **STI** can answer common workforce planning questions. For additional information on **STI**, contact:

Massachusetts Occupational Information Coordinating Committee
19 Staniford Street
Boston, MA 02114

Telephone: 617-727-6718 or 617-727-6531

STATE TRAINING INVENTORY
STI

The **State Training Inventory (STI)** is a computerized database that allows users to identify training programs and providers at the secondary and postsecondary levels, by:

- **Geographic area**, including service delivery area (SDA), county, labor market area, metropolitan statistical area, Massachusetts or multi-State area (New England and New York).

- **Type of institution**, including secondary and adult vocational or technical school, community or technical college, four-year college or university, proprietary school, hospital, and JTPA.

- **Occupational title** or **training program** title or code.

STI contains several features useful to employment and training organization users. These include the SDA geographic coding of all schools in the database. This allows users to specify their SDA area and obtain a comprehensive listing of the existing training resources for that area. Users may also specify an occupational title and obtain a listing of local providers offering related training. **STI** has the addresses and telephone numbers of all providers.

STI was developed by the Massachusetts Occupational Information Coordinating Committee (MOICC) in cooperation with the National Occupational Information Coordinating Committee and the Massachusetts Department of Employment and Training. The database is updated annually and is available to users in print or disk format.

Please *note* that inclusion of any school, hospital or other institution does not constitute an endorsement of the programs being offered and, while we sought to provide accurate and complete information, errors and omissions may have occurred.

MOICC can provide a demonstration of **STI** and arrange for copies of the software and support materials, including a manual describing how **STI** can answer common workforce planning questions. For additional information on **STI**, contact:

Massachusetts Occupational Information Coordinating Committee

MASSACHUSETTS
STATE TRAINING INVENTORY
STI

The **State Training Inventory (STI)** is a computerized database that allows users to identify training programs and providers at the secondary and postsecondary levels, by:

- **Geographic area**, including service delivery area (SDA), county, labor market area, metropolitan statistical area, Massachusetts or multi-State area (New England and New York).

- **Type of institution**, including secondary and adult vocational or technical school, community or technical college, four-year college or university, proprietary school, hospital, and JTPA.

- **Occupational title** or **training program** title or code.

STI contains several features useful to employment and training organization users. These include the SDA geographic coding of all schools in the database. This allows users to specify their SDA area and obtain a comprehensive listing of the existing training resources for that area. Users may also specify an occupational title and obtain a listing of local providers offering related training. **STI** has the addresses and telephone numbers of all providers.

STI was developed by the Massachusetts Occupational Information Coordinating Committee (MOICC) in cooperation with the National Occupational Information Coordinating Committee and the Massachusetts Department of Employment and Training. The database is updated annually and is available to users in print or disk format.

MOICC can provide a demonstration of **STI** and arrange for copies of the software and support materials, including a manual describing how **STI** can answer common workforce planning questions. For additional information on **STI**, contact:

Massachusetts Occupational Information Coordinating Committee
19 Staniford Street
Boston, MA 02114

Telephone: 617-727-6718 or 617-727-6531

STI

The **State Training Inventory (STI)** is a computerized database that allows users to identify training programs and providers at the secondary and postsecondary levels, by:

- **Geographic area**, including service delivery area (SDA), county, labor market area, metropolitan statistical area, Massachusetts or multi-State area (New England and New York).

- **Type of institution**, including secondary and adult vocational or technical school, community or technical college, four-year college or university, proprietary school, hospital, and JTPA.

- **Occupational title** or **training program** title or code.

STI contains several features useful to employment and training organization users. These include the SDA geographic coding of all schools in the database. This allows users to specify their SDA area and obtain a comprehensive listing of the existing training resources for that area. Users may also specify an occupational title and obtain a listing of local providers offering related training. **STI** has the addresses and telephone numbers of all providers.

STI was developed by the Massachusetts Occupational Information Coordinating Committee (MOICC) in cooperation with the National Occupational Information Coordinating Committee and the Massachusetts Department of Employment and Training. The database is updated annually and is available to users in print or disk format.

Please *note* that inclusion of any school, hospital or other institution does not constitute an endorsement of the programs being offered and, while we sought to provide accurate and complete information, errors and omissions may have occurred.

MOICC can provide a demonstration of **STI** and arrange for copies of the software and support materials, including a manual describing how **STI** can answer common workforce planning questions. For additional information on **STI**, contact:

STATE TRAINING INVENTORY
STI

The **State Training Inventory (STI)** is a computerized database that allows users to identify training programs and providers at the secondary and postsecondary levels, by:

- **Geographic area**, including service delivery area (SDA), county, labor market area, metropolitan statistical area, Massachusetts or multi-State area (New England and New York).

- **Type of institution**, including secondary and adult vocational or technical school, community or technical college, four-year college or university, proprietary school, hospital, and JTPA.

- **Occupational title** or **training program** title or code.

STI contains several features useful to employment and training organization users. These include the SDA geographic coding of all schools in the database. This allows users to specify their SDA area and obtain a comprehensive listing of the existing training resources for that area. Users may also specify an occupational title and obtain a listing of local providers offering related training. **STI** has the addresses and telephone numbers of all providers.

STI was developed by the Massachusetts Occupational Information Coordinating Committee (MOICC) in cooperation with the National Occupational Information Coordinating Committee and the Massachusetts Department of Employment and Training. The database is updated annually and is available to users in print or disk format.

Please *note* that inclusion of any school, hospital or other institution does not constitute an endorsement of the programs being offered and, while we sought to provide accurate and complete information, errors and omissions may have occurred.

MOICC can provide a demonstration of **STI** and arrange for copies of the software and support materials, including a manual describing how **STI** can answer common workforce planning questions. For additional information on **STI**, contact:

Massachusetts Occupational Information Coordinating Committee

STATE TRAINING INVENTORY
STI

The **State Training Inventory (STI)** is a computerized database that allows users to identify training programs and providers at the secondary and postsecondary levels, by:

- **Geographic area**, including service delivery area (SDA), county, labor market area, metropolitan statistical area, Massachusetts or multi-State area (New England and New York).

- **Type of institution**, including secondary and adult vocational or technical school, community or technical college, four-year college or university, proprietary school, hospital, and JTPA.

- **Occupational title** or **training program** title or code.

STI contains several features useful to employment and training organization users. These include the SDA geographic coding of all schools in the database. This allows users to specify their SDA area and obtain a comprehensive listing of the existing training resources for that area. Users may also specify an occupational title and obtain a listing of local providers offering related training. **STI** has the addresses and telephone numbers of all providers.

STI was developed by the Massachusetts Occupational Information Coordinating Committee (MOICC) in cooperation with the National Occupational Information Coordinating Committee and the Massachusetts Department of Employment and Training. The database is updated annually and is available to users in print or disk format.

Please *note* that inclusion of any school, hospital or other institution does not constitute an endorsement of the programs being offered and, while we sought to provide accurate and complete information, errors and omissions may have occurred.

MOICC can provide a demonstration of **STI** and arrange for copies of the software and support materials, including a manual describing how **STI** can answer common workforce planning questions. For additional information on **STI**, contact:
